Voullaire’s®
EE-MULS-OYLE™
MULTI-PURPOSE DRYING OIL

ACTIVE CONSTITUENT:
596 g/L Ethyl and Methyl Esters of Fatty Acids produced from Food Grade Canola Oil

An emulsifiable concentrate to assist vine fruit drying.
DIRECTIONS FOR USE

GENERAL INSTRUCTIONS

Use recommended rates only and take care in measuring all ingredients. EXCESSIVE POTASH RESIDUE ON BERRIES LEADS TO PROCESSING DAMAGE AND POOR QUALITY FRUIT. Slow drying is caused by unfavourable drying conditions, such as cool, still or humid weather.

For even-drying, the fruit must be completely covered with emulsion. To help ensure this, the emulsion may be re-applied 4-5 days after the initial treatment. Drying time is retarded, not enhanced, by additional unnecessary applications of drying emulsion. If rain occurs within three days of application and removes significant amounts of emulsion it should be re-applied.

Caustic Potash should not be used on sultanas in any circumstances, and is not recommended for raisins. Avoid applying Voullaire’s EE-MULS-OYLE to immature fruit of less than 22˚ Brix, and avoid spraying at low ambient temperatures (<15˚C). When Vine Spraying, apply emulsion within 4 days of cane cutting or vice versa.

SAFETY DIRECTIONS

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN.

Store in the closed, original container, in a well ventilated area, out of direct sunlight. Triple, or preferably pressure rinse containers before disposal. Add rinsing to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt. Returnable 1000 L Containers: If returning 1000 L containers do not rinse, instead replace cap and return to designated collection point.

SPILLAGE

In the event of spillage absorb onto sand or chemical absorbent. Remove residue with detergent and hot water. Dispose of by normal waste disposal methods conforming to local authority codes.

MIXING INSTRUCTIONS

Fill the tank with water and with agitation dissolve the required amount of Potassium Carbonate, when completely dissolved add the required amount of Voullaire’s EE-MULS-OYLE.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT

Do not contaminate streams, rivers or waterways with the chemical or used containers.

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

SUGGESTIONS FOR USE
