**HASTEN - COTTON**

**SPRAY ADJUVANT**

**HASTEN-COTTON** spray adjuvant is a blend of esterified cottonseed oil and non-ionic surfactants that has:

- Proven cost effective performance with a wide range of agricultural products,
- Excellent plant and insect penetrating and wetting properties,
- An internationally recognised tradename and reputation for reliability,
- Renewable material – Cottonseed oil – as its base raw material,
- A high quality formulation providing easy dispersion and stable emulsion characteristics, and
- International Patents granted.

**Product Description**

**HASTEN-COTTON** is a unique spray adjuvant that has been designed to improve the efficacy of a wide range of agricultural products including; Defoliants, Insecticides, Herbicides (selective and non-selective) and Fungicides. The Active Constituent in **HASTEN-COTTON** is derived from Cottonseed Oil.

**Defoliant Applications**

When **HASTEN** is mixed with certain defoliant products and applied in the field, the non-ionic surfactants in the **HASTEN** formulation help to retain spray droplets and ensure thorough coverage of plant surfaces. The esterified oil in the **HASTEN** formulation will retard crystallization of water soluble defoliants as water evaporates from spray droplets. It will also increase the penetration of systemic defoliants through a plant’s epicuticular waxy surface leading to enhanced defoliation. It is this dual action of surfactant and esterified oil which makes **HASTEN** a very effective adjuvant with certain defoliation programs.

Now with Cotton seed oil

**HASTEN**

*Investing in Australian Cotton*
Insecticide Applications

**HASTEN** is suitable for use with various insecticides used in Cotton. **HASTEN** can be used to increase the efficacy of systemic insecticides such as Synthetic Pyrethroid insecticides, Skope* and Movento*. See Directions for Use on **HASTEN-COTTON** label and on the Insecticide product label.

Testing and Evaluation

**HASTEN** is a non-ionic formulation which makes it compatible with most defoliants. In fact, **HASTEN** has been used with defoliants around the world and has been found to be physically compatible with major defoliant products.

**HASTEN** has been tested and evaluated by universities, lifescience companies, research organizations and independent researchers over many years. It has been established that **HASTEN** is a very effective adjuvant for improving the performance of certain defoliation programs.

Commercial Use

**HASTEN** is successfully used by farmers in many different countries around the world with a diverse range of agricultural products including defoliants. In Australia and the USA, **HASTEN** is recognised as a leading adjuvant by farmers, distributors and lifescience companies.

**HASTEN** is endorsed by major manufacturers for use with the following Defoliation products:

- DROPP®, eChem Thidiazuron 500 and other Thidiazuron products
- DROPP*ULTRAMAX, eChem Thi-Ultra, and other Thidiazuron + Diuron products
- ETee® Defoliant

Suggestions for Use

**HASTEN** may be used in place of non-ionic surfactants or crop oil concentrates when permitted by defoliant labels. When using DROPP* Ultra in Australia, use **HASTEN** at 0.5 Litres per hectare. We recommend that a compatibility test be conducted before using **HASTEN** with other defoliants on a large scale.

When using with Movento* 240SC or Skope* Insecticide, apply **HASTEN** at 1.0L/ha. Typically, **HASTEN** is added to the spray tank at a concentration of 0.5-1.0% when spray volumes are between 50-100 Litres per hectare. In situations where the agricultural practice is to use a higher volume than 100 Litres per hectare, **HASTEN** is typically used at 0.5-1.0 Litres per hectare.

General Information

The information contained in this bulletin is of a general nature. Further information is available regarding **HASTEN**’s use with Defoliants, Herbicides, Insecticides and Fungicides. Please visit our web site at www.vicchem.com to also access Label and MSDS information.

General Specifications

- **Appearance**: Bright Clear Liquid
- **Specific Gravity (20ºC)**: 0.9 g/ml
- **Colour**: 10 Gardner Max

The Company

Victorian Chemical Company is committed to providing quality products and professional and friendly service, that our customers can confidently rely on to add value to their businesses. In order to achieve this goal we will continue to develop, our understanding of our customer’s requirements, the operations of our company and our technical expertise.

**Disclaimer**: Victorian Chemical Company Pty. Ltd. has taken all reasonable care in preparing the information contained in the bulletin. However because the use of this information is beyond our control, Victorian Chemical Company Pty. Ltd. accepts no responsibility for any consequences whatsoever arising from the use of this information except responsibility imposed under any applicable law.
